All,
The Incoming Vehicle Inspection, Maintenance and Fuel Drain have been completed on this vehicle. The Regen is 51%. The DEF Fluid level is monitored through the computer. I cannot see how full it is. If it gets near empty or around 1000 miles to empty a message will appear on the dash to fill the DEF Fluid.
It is ready for Test.
Thanks

Subject: FW: VW GEN ! TDI Jetta from ARB
Importance: High

Good morning,

Please see Lynn's e-mail below. The control number for this vehicle is X400RXX-0009. We will need to do a body inspection and also a M2 Maint. I am working on getting all the paperwork together for this vehicle.

Any questions, please let me know.

Thanks,

Kim

Hi.

Please see Jim's note below. This new vehicle belongs in the X400 series. Once a Vehicle ID is assigned to it, I believe that Terry can send out the parameter sheet and additional vehicle prep info.

Please do a limited Maintenance that consists of the items mentioned by Jim below.

Let me know if you have any questions.

Thank you,

Lynn

Lynn, the VW Jetta from ARB arrived this afternoon. We just want to run an FTP on it. Since its not a customer car, rather than the full maintenance, , can Jacobs perform a more limited prep?

1. Install Tailpipe flange. Temporary is acceptable.
2. Tie down point. If needed they grab a bumper tie down hook from one of the other VW sedans in the soak area. (we are done testing them)
3. Check DPF status and Diagnostics
4. Drain the fuel tank.

Vehicle is a red 2014 VW GEN 1 TDI Jetta VIN# Ex. 6 Personal Privacy (PP) parked outside of garage.

Attached are the Drain and Abs instructions from before along with the parameter sheet. I don't know what Vehicle number will be so I left it 000X.
